VS 151

PLEASE WRITE PLAINLY with pen or pencil, and do not use abbreviations. In stating the cause of death, diseases resulting from the primary cause, or complications, should be clearly described, with the primary cause last. If death was due to external causes, state the accident, suicide or homicide, and describe how injury occurred. Do not report the mode of dying, such as heart failure, asthenia, or shock. Indefinite or unsatisfactory terms, such as "old age," "natural causes," "senility," "debility," etc., should not be used as the principal cause of death. Where practicable, a physician should certify to the cause of death. If not, the coroner is required to investigate the cause of death. Please write the correct age in years, months, days, hours or minutes, as the case may be. Physician: please write the correct age is especially important.
